3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms "in particular" in claim 1 is unclear and should be deleted. The phrases "on the one hand" and "on the other hand" in claim 2 is unclear and should be deleted. Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sorlin (FR2416825).

Sorlin disclose a crawler-tracked vehicle with variable track width comprising a vehicle motor (not shown); an overvehicle 11; an undervehicle 10 which includes a vehicle frame 1; a chassis carrier (17, 21); at least one driving wheel (see figure 1) and one deflecting wheel (5, 8); crawler tracks (6,9) wherein the distance of the crawler tracks from the vehicle frame is variable, wherein at least one of the two chassis carriers can be fastened releasably to the vehicle frame at a different distance transversely to the undervehicle with the aid of carrying means arranged laterally at the front and rear and with the aid of receiving and supporting means and with the aid of holding and releasing means (25, 26). The carrying means and the receiving and supporting means are arranged on the chassis carrier and/or on the vehicle frame. A freely projecting carrying arm is provided as carrying means. The carrying arm is at least partially U-shaped in cross section. The carrying arm is at least partially L-shaped in cross section. The receiving and supporting means are in each case receiving parts of U-shape and/or L-shaped cross section. The carrying arms of U-shaped cross section are arranged, with the cross section open downward, on the vehicle frame and/or on the chassis carrier. The receiving and supporting means are arranged, with the cross section open downward, on the vehicle frame and/or on the chassis carrier. The receiving and supporting means are arranged so as to project freely laterally beyond side walls of the vehicle frame. The receiving parts projecting freely as receiving and supporting means laterally on the vehicle frame are profile parts extending in one piece through the interior of the vehicle frame. At least one profile part 13 has a passage orifice directed into the interior of the vehicle frame. A drive for each crawler track is arranged directly on the respective chassis carrier.

Allowable Subject Matter

7. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
